Assessment

None*

Why your
Health Center
chose this
tool?

**readily
available,**

**adapted more
to our
program goals**

What are the
advantages
of using this
tool?

**Gives more
in-depth/detailed
answers**

simplicity

**EHR
based so
all have
access**

What are the
limitations
of using this
tool?

**Limited depth of
questions/answers.
Can miss inpt.info**

**scripting
functionality
of other tools
is not really an
option**

**Difficult to
compare our
results with
KCPH/CDC,
etc**

**Technical
jargon**

How this tool is
administered
and by which
staff member?

**Administered
during intake
and CHW
follows
through**

**Comm. Health
Workers, Care
Mgmt nurses,
verbal**

**our CHW's
administer
assessment
via phone or
in person**

Linking SDOH Referrals and Resources

How are ag workers and their families getting connected to resources?
What are the biggest challenges?

Follow-up/follow-through after initially providing the clients with the resource information

connected via CHW in person (clinic) or on phone. Challenge is follow through on pt part

challenges-lack of funding

Losing contact with clients due to phone issues/lack of connectivity

lack of boots on the ground to meet the pts where they work/live

Timing is an issue-we work with folks living homeless, and they may be out at food banks or elsewhere when our team is working on the ground

How are you building your resource lists and relationships with community-based organizations to address these social needs?

**Joining
Unite
Us**

We have a set of agencies we refer to and have good luck with

Care Network has access to shared resources list

educating member on services provided by organizations and process of applying for programs, required docs etc etc.

Holding and attending community outreach events
