

See What You're Missing – WACH Hosts Optos Presentation October 7th, 11:00 AM Via Teams

For over 30 years, Optos has focused on developing easy to use retinal imaging technology, helping health care providers to save sight and save lives.

Traditional retinal cameras show only 15% of the retina. Optos UWF imaging shows virtually the entire retina - up to 82% - in a single capture for 98% gradable images with less time than traditional fundus cameras.

Optos empowers over 30,000 customers to provide retinal exams. Hundreds of point-of-care locations are utilizing the only true UWF imaging technology to successfully close the diabetic retinal eye exam, improve HEDIS measures and gain reimbursement utilizing widely accepted CPT codes.

If you need the Teams link resent to you, please contact **Jade Akana**.

News Briefs

Medline Boosts California Footprint with New Warehouses Following Tracy Fire

Following a devastating fire, Medline is rapidly expanding its Northern California distribution network with over 1.6 million square feet of new warehouse space.

Direct Relief Wildfire Emergency Response: California, Washington, & Idaho

Direct Relief delivered medical support to the Community Health Association of Spokane (CHAS Health), a health center continuing to provide essential services amid ongoing wildfires.

The shipment contained:

- Field medic packs to equip first responders.
- Personal care products for displaced residents in evacuation shelters.
- Personal protective equipment for community members returning to burn zones

FedEx Announces FedEx Life Sciences Organization

FedEx Life Sciences provides dedicated support for complex health care shipments, including temperature-sensitive therapies and clinical trial materials. The organization is meant to support the movement of pharmaceuticals, medical devices, and other health care industry shipments and features a specialized health care team and advanced monitoring capabilities to ensure supply chain integrity.

FedEx is investing in global infrastructure, opening six Life Sciences Centers worldwide to enhance local support and expertise. New routes between Indianapolis and Dublin strengthen transatlantic connectivity, linking key pharmaceutical manufacturing hubs.

This initiative builds on FedEx's existing health care infrastructure, making supply chains smarter, more resilient, and better equipped to handle critical health care logistics.

Building a Healthier Future Together: Henry Schein and Special Olympics Renew Partnership Through 2030

Access to quality health care can make a profound difference in a person's life. Yet for many people with intellectual disabilities (ID), barriers to care remain a daily reality. According to **Special Olympics,** despite severe need and higher health risks, individuals with ID are often denied health services and have a life expectancy that is, on average, 16 years shorter than the general population.

Through this partnership, which began in 2018, Henry Schein donates essential oral health and medical care products for the Special Olympics Healthy Athletes® program. Since 1997, Healthy Athletes has delivered over two million free health screenings to Special Olympics athletes worldwide and trained more than 300,000 health care professionals and students to treat people with ID. The donations to Healthy Athletes are an initiative of **Henry Schein Cares**, the company's global corporate citizenship program, celebrating its 25th anniversary this year.
